SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications using Angular and Spring Boot. Skilled in leading framework migrations (Angular 14 to Angular 21), modernizing test suites with AI-assisted automation, and developing micro frontend architectures with single-spa. Proficient in Java 17, MySQL, Kafka, and end-to-end frontend/backend development, with a strong focus on performance, maintainability, and continuous improvement.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS, SQL, JSON

Frameworks & Libraries: Angular (8-21), Angular Material, RxJs, Spring Boot, Spring MVC, Spring JPA, single-spa (Angular Micro Frontends / MFE), AG-Grid, Highcharts, Jasmine, Karma

Data & Messaging: MySQL, RDBMS, Apache Kafka

Tools & Platforms: Windows, Linux, VS Code, IntelliJ, Eclipse, Postman, Chrome DevTools, Git

EXPERIENCE

Alumnus Software Limited – Member of Technical Staff I

Kolkata, India | 05/2023 – Present

- Working on the Extreme SD-WAN product, delivering new features and resolving production bugs to improve reliability and user experience.
- Led the migration of the core Angular application from Angular 14 to Angular 21, upgrading dependencies, resolving breaking changes, and adopting the latest framework APIs.
- Re-architected unit test suites from a shared/dependent setup to an isolated, constructor-based testing approach, improving test reliability and maintainability.
- Reduced overall test suite compilation and execution time from over 10 minutes to 2-3 minutes through test isolation and structural optimizations.
- Utilized an AI coding agent to accelerate migration of legacy unit test cases to the new constructor-based pattern, significantly cutting manual migration effort.
- Implemented micro frontend architecture using single-spa to enable independent deployment and modular development of Angular applications.

Technologies: Angular 14-21, single-spa (Angular MFE), Angular Material, AG-Grid, TypeScript, Highcharts, Jasmine, Karma

Tata Consultancy Services – Assistant System Engineer

India | 04/2021 – 04/2023

- Silver Light Migration Project: Worked as a Full Stack Developer across both frontend and backend, migrating legacy Silver Light functionality to Angular 8 on the frontend and building backend services with Spring Boot using Java 17, following the TDD approach.
- Designed and developed UI components based on user requirements, focusing on usability and consistency.
- Main Branch Development: Built a client-facing internal web application to track services provided to end users, designing the UI per client input using Angular 12/13 and following the TDD approach.

Technologies: Angular 8, Angular 12/13, Spring Boot, Java 17, Angular Material, TypeScript, Jasmine, Karma

EDUCATION

B.Tech, Electronics & Communication Engineering – Heritage Institute of Technology, Kolkata, WB (2016-2020) – CGPA: 7.21

Class XII, CBSE – Woodbine Modern School, Darbhanga, Bihar (2014-2015) – 90.2%

Class X, CBSE – Woodbine Modern School, Darbhanga, Bihar (2012-2013) – 10 CGPA

CERTIFICATIONS

Relational Database Design – Udemy

Java Programming For Complete Beginners – Udemy

ACHIEVEMENTS

Awarded Best Team Award for outstanding work and on-time project completion.
